DETAILED ACTION

Introduction

1. The examiner acknowledges the applicant's submission of the amendment dated 2/16/2006. At this point, claims 11-25 and 29-37 are withdrawn, claims 1-2, 4-10 and 26-28 are pending in the instant application.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 11-25 and 29-37 are cancelled based on elected without traverse filed on 11/19/2004.

Response to Arguments

3. The applicant has argued that Block et al. in view of Kirlin and Jeon are silent with respect to a thin film capacitor layer comprising a barrier layer comprising a non-conductive inorganic material is provided between the capacitor and a protective insulating layer, and the barrier layer is a material having the same thermal expansion coefficient as that of a dielectric layer. The examiner finds this argument persuasive. Therefore, the examiner made decision to allow this limitation over the prior art or record.

Allowable Subject Matter

4. Claims 1-2, 4-10 and 26-28 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1-2, 4-10, the prior art alone or in combination does not teach the limitation of a thin film layer capacitor comprising a thin film capacitor layer comprising a barrier layer comprising a non-conductive inorganic material is provided between the capacitor and a protective insulating layer, and the barrier layer is a material having the same thermal expansion coefficient as that of a dielectric layer.

With respect to claims 26-28, the prior art alone or in combination does not teach the limitation of a process for production of a thin film layer capacitor comprising the steps of: forming a barrier layer from a non-conductive inorganic material having the same thermal expansion coefficient as that of the dielectric layer, on the capacitor and forming at least one protective insulating layer on the barrier layer so that the capacitor and the protective insulating layer is separated from the barrier layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nguyen T. Ha whose telephone number is 571-272-1974. The examiner can normally be reached on Monday-Friday from 8:30AM to 6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dean Reichard can be reached on 571-272-2800 ext. 31. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
